Definition: Whether a household's accommodation is overcrowded, ideally occupied or under-occupied. This is calculated by comparing the number of bedrooms the household requires to the number of available bedrooms. An occupancy rating of:

- -1 or less: implies that a household's accommodation has fewer bedrooms than required (overcrowded)
- +1 or more: implies that a household's accommodation has more bedrooms than required (under-occupied)
- 0: suggests that a household's accommodation has an ideal number of bedrooms

Base: All households.

Greater Manchester	13,695	1,128,066	443,546	84,356

The dimensions of deprivation used to classify households are indicators based on the four selected household characteristics. A household is deprived in a dimension if they meet one or more of the following conditions:

- Employment: any member of a household not a full-time student is either unemployed or long-term sick,
- Education: no person in the household has at least level 2 education (see highest level of qualification), and no person aged 16-18 is a fulltime student,
- Health and disability: any person in the household has general health 'bad or very bad' or has a long term health problem, and
- Housing: Household's accommodation is ether overcrowded, with an occupancy rating -1 or less, or is in a shared dwelling, or has no central heating.
- A household is classified as being deprived in none, or one to four of these dimensions in any combination.

Base: All households.

Definition: The dimensions of deprivation used to classify households are indicators based on four selected household characteristics:

- Education: A household is classified as deprived in the education dimension if no one has at least level 2 education and no one aged 16 to 18 years is a full-time student.
- Employment: A household is classified as deprived in the employment dimension if any member, not a full-time student, is either unemployed or economically inactive due to long-term sickness or disability.
- Health: A household is classified as deprived in the health dimension if any person in the household has general health that is bad or very bad or is identified as disabled. People who have assessed their day-to-day activities as limited by long-term physical or mental health conditions or illnesses are considered disabled. This definition of a disabled person meets the harmonised standard for measuring disability and is in line with the Equality Act (2010).
- Housing: A household is classified as deprived in the housing dimension if the household's accommodation is either overcrowded, in a shared dwelling, or has no central heating.

Base: All households.

Definition: The dimensions of deprivation used to classify households are indicators based on four selected household characteristics:

- Education: A household is classified as deprived in the education dimension if no one has at least level 2 education and no one aged 16 to 18 years is a full-time student.
- Employment: A household is classified as deprived in the employment dimension if any member, not a full-time student, is either unemployed or economically inactive due to long-term sickness or disability.
- Health: A household is classified as deprived in the health dimension if any person in the household has general health that is bad or very bad or is identified as disabled. People who have assessed their day-to-day activities as limited by long-term physical or mental health conditions or illnesses are considered disabled. This definition of a disabled person meets the harmonised standard for measuring disability and is in line with the Equality Act (2010).
- Housing: A household is classified as deprived in the housing dimension if the household's accommodation is either overcrowded, in a shared dwelling, or has no central heating.

Base: All households.

Primary Schools Attainment 2019 Terminology

Pupils meeting expected standard in reading, writing and maths	Pupils are meeting the expected standard if they achieve a scaled score of 100 or more in their reading and maths tests, and their teacher assesses them as 'working at the expected standard' or better in writing.
Pupils achieving at a higher standard in reading, writing and maths	Pupils are achieving at a higher standard if they achieve a scaled score of 110 or more in their reading and maths tests, and their teacher assesses them as 'working at a greater depth within the expected standard' in writing. We set this standard for the first time in 2016 to provide information about pupils across England achieving in the top 5%.
Average score in reading	This score shows how well pupils performed in the key stage 2 reading test. This score is known as the reading 'scaled score'. The score is an average for pupils in the school. The expected standard is a score of 100 or more. The higher standard is 110 or more.
Average score in maths	This score shows how well pupils performed in the key stage 2 maths test. This score is known as the maths 'scaled score'. The score is an average for pupils in the school. The expected standard is a score of 100 or more. The higher standard is 110 or more.
Progress score and description	<p>These scores show how much progress pupils at this school made in reading, writing and maths between the end of key stage 1 and the end of key stage 2, compared to pupils across England who got similar results at the end of key stage 1.</p> <p>The scores are calculated by comparing the key stage 2 test and assessment results of pupils at this school with the results of pupils in schools across England who started with similar assessment results at the end of the previous key stage – key stage 1.</p> <p>A score above zero means pupils made more progress, on average, than pupils across England who got similar results at the end of key stage 1. A score below zero means pupils made less progress, on average, than pupils across England who got similar results at the end of key stage 1.</p> <p>A negative progress score does not mean pupils have made no progress, or the school has failed, rather it means pupils in the school made less progress than other pupils across England with similar results at the end of key stage 1.</p> <p>The majority of schools have progress scores between -5 and +5.</p>

Secondary Schools Attainment 2022 Terminology

Progress 8 score	This score shows how much progress pupils at this school made across 8 qualifications between the end of key stage 2 and the end of key stage 4.
Entering EBacc	A pupil is considered to have entered for the English Baccalaureate if they entered for qualifications in English, maths, sciences, a language and either history or geography.
Staying in education or entering employment	This shows the number of pupils who either stayed in education or went into employment after finishing key stage 4 (after year 11, usually aged 16).
Grade 5 or above in English & maths GCSEs	This tells you the percentage of pupils who achieved grade 5 or above in English and maths GCSEs.
Attainment 8 score	Schools get a score based on how well pupils have performed in up to 8 qualifications.
EBacc average point score	The EBacc average points score calculates a pupil's average point scores across the 5 pillars of the English Baccalaureate.

Greater Manchester	13,695	2,867,817	240,777	285,155	525,932

Definition: People who assessed their day-to-day activities as limited by long-term physical or mental health conditions or illnesses are considered disabled. This definition of a disabled person meets the harmonised standard for measuring disability and is in line with the Equality Act (2010).

Comparability with 2011: Broadly comparable. The question related to this variable was split into two parts for Census 2021. In Census 2021 we asked people completing the questionnaire if they have any physical or mental health conditions or illnesses. In the 2011 Census, people were asked if they have a health problem or disability. We also removed the option to include information about problems related to old age.

Base: All usual residents.

Definition: People who assessed their day-to-day activities as limited by long-term physical or mental health conditions or illnesses are considered disabled. This definition of a disabled person meets the harmonised standard for measuring disability and is in line with the Equality Act (2010).

Comparability with 2011: Broadly comparable. The question related to this variable was split into two parts for Census 2021. In Census 2021 we asked people completing the questionnaire if they have any physical or mental health conditions or illnesses. In the 2011 Census, people were asked if they have a health problem or disability. We also removed the option to include information about problems related to old age.

Base: All usual residents.
