

Field Technician

Full time

Wythenshawe + travel throughout UK

If you want an interesting role, offering training and excellent career prospects with a growing company, this could be for you. As a field technician, you would travel to different sites (currently Cheadle, Bristol and Sheffield) to collect dust, noise and vibration samples and results, downloading data and reporting back to the head office. You will need excellent communication skills, computer literacy and an ability to hit the ground running. Majority of work will be unsupervised, so reliability, flexibility and self-motivation are crucial. The role involves significant travel and overnight stays, for which expenses and a company car will be provided.

UA Antia is a growing business and this role will provide any candidate a great opportunity to build a career with strong chances for promotion in the future.
